

## Preface

This is a monthly bulletin of migration reports produced by the Statistics Department as the main reference on a volume of overseas visitors, cruise ship passengers, yacht passengers and resident's movement to and from the Kingdom of Tonga. This bulletin covers the period of October 2020, includes tables providing a monthly breakdown of the data. Comparative data for previous years are also included in this bulletin. Most of the information contained in this bulletin was obtained from the Immigration Department database on international arrivals and departures.

The main purpose of collecting and compiling statistics on International Arrivals and Departures, or Migration Statistics, is to make migration data available for planners and decision-makers. Tonga has a high rate of Net Migration, with more people moving out of Tonga than arriving. Production of Migration Statistics and their components enables the Statistics Department to estimate the resident population and to produce Population Projections for the whole Kingdom.

This bulletin presents information relating to the number of arrivals and departures by sex, purpose of travel, reasons for absence, country of usual residence and country visited.

A special thanks are extended to the Immigration Department of the Ministry of Foreign Affairs and Trade, Customs Departments of the Ministry of Revenue Services, Airport terminal Services, Tonga Airport Limited and Port Authority for their assistance in providing their administrative information relating to these statistics. I am also grateful particularly to my staff in the Population and Social Statistics Division who contributed to the compilation of this report.

Any suggestions that recipients of this bulletin wish to make for its future improvement will be welcomed by the Statistics Department.
